

2021 Spring MAP Technical Conference

Tool Tech Hybrid Event

This Spring, MAP will be partnering with ETI and NASTF to host our first joint hybrid event. The event will be May 24-27, all virtual MAP content will be free to all AMRA members.

MAP Virtual Sessions

May 24

1:00-2:00 CDT - Donny Seyfer - NASTF

Learn about NASTF Service Information Request as well as NASTF AIR (Assisted Immobilizer Reprogramming) program - what it is and how it will benefit a repair shop and lower investment in tooling that is rarely used.

2:00-3:00 CDT A/C Update - Peter McArdle - 4Seasons

Update on r1234yf, a/c servicing tips and issues affecting shops today.

3:00-3:30 CDT Legislative Update - Jeff Cox - AMRA

Update on bills and regulations affecting the automotive aftermarket

May 25

1:00-2:00 CDT Aftermarket Oil Audit / Spec Update - API

Jeff Harmening, manager-EOLCS/DEF/MOM for API, will explain how the testing program works and the benefits it will provide to shops and ultimately the consumer. He will also provide an update on the current ILSAC GF-6A and GF-6B and API SP and why they will be a focus for testing in 2021.

2:00-3:00 CDT Top 5 Misfire Diagnostic Tests - Garage Gurus

During this class we will be discussing and showing methods to diagnose misfires using an oscilloscope and scan tool. Utilizing special test with low and high amps probes, inductive wands, and in-cylinder pressure transducers. These methods and tests will help speed up your diagnostic time.

May 26th

1:45-2:15 CDT Service Provider Panel

2:15-2:45 CDT Shop Owner's Panel

All Virtual MAP Sessions Free for AMRA Members
